Personal Projects

One Health (Ongoing)

- This project is an attempt to make an interface which is inspired by the Government of India's **UHI initiative**
- Users have easy and hassle access to their past medical history and medical institutes can directly upload the reports and access the previous medical history of the patient to the patient's health portal

Tech: HTML, CSS, JS, NodeJS, SQL

Real Time Location Tracker

- Real-time tracking application that allows users to share their live location on a map using Leaflet.js and Socket.io. The application uses Node.js for the backend and serves an EJS template for the front end. The real-time communication between clients is handled by Socket.io.
- Features Real-time location tracking. Multiple users can see each other's locations on the map. Location updates are handled efficiently using WebSockets. User-friendly interface with Leaflet.js for map visualization.

Technical Skills and Interests

Technical Skills	C++, Java, Python, DSA, OOPS
Development	HTML, CSS, JS, Node-JS, SQL
Additional Skills	Canva, Jira, Slack, Excel.
Soft Skills	Teamwork, Time Management, Team Leading, Problem Solving
